Help us fight fraud with cart content and basic Barion Pixel		✓	✓	
Help us with consented data using Barion Pixel			✓	
Use Barion only for electronic payment			✓	

### Definitions and Conditions

#### General conditions, volume based fees

**General conditions** The Barion Smart Gateway fees of Starter and Advanced package apply for the given merchant if:

- the monthly average cart size of Barion Gateway payments is above 20 EUR/500 CZK/6000 HUF/25 USD,
- the monthly ratio of commercial cards and cards issued outside of the EU together is less than 2% (based on the sum).

Barion is entitled to increase its fees, if one of the conditions are not met by the merchant. In case of a formerly set tariff package if any conditions become ungratified, Barion is entitled to unilaterally determine different tariff package, or to determine individual fees (justified by the extra costs arising from the breach of such conditions) for acceptance of bank card and Barion balance, or to terminate the agreement with immediate effect.

**Volume based fees** If volume target is reached, the volume preference is set during the next calendar month. The decline of volume may result in termination of preferences. In case of prominently high sales volume, there is a possibility for additional preferences, ask for our special offer!

#### Defintion of extra, sharing economy and marketplace services

**Escrow** In case of escrow the paid amount is transferred to the beneficiary's Barion account, however it is not available until the payment facilitator verifies the payment. The final amount is defined by the payment facilitator as well.

**Recurring/Token payment** In case of recurring/token payment, the customer authorises the merchant with the first payment to repeat the payment with arbitrary frequency and amount. It is convenient for subscription or one-click payment scenarios. This functionality is subject to a special approval process made by Barion, it is not automatically part of the onboarding process.

**Payments with three or more parties involved** The paid amount is sent to several users' Barion account defined by the payment facilitator. The facilitator pays the transaction fees, but can also deduct fees from the parties involved.

#### Definition of conditions for tariff packages

**Place card types and Barion logo on merchant website** Merchant has to place the card types and Barion logo on its website according to the guidelines of Barion. A comprehensive description is published on the Barion website.

**Help us fight fraud with cart content and basic Barion Pixel** Barion scores every payment for fraud risk to help the merchant avoid any loss arising from fraud. The item level cart content and the activity of the visitor are important factors in the fraud risk score and it is the legitimate interest of both parties to analyze it for fraud management purposes. This information is not used for marketing purposes without the consent of the user.

**Help us with consented data using Barion Pixel** Barion Pixel is a snippet of JavaScript code that tracks visitor activity on the merchant website. The merchant has to add and configure the Barion Pixel in the source code of its website with GDPR compliant consent management. User data is used for marketing purposes only in case of user consent.

**Use Barion only for electronic payment** Barion is the only mode of payment for cards on the merchant website. Purchases paid by bank transfer or pay on delivery are not rated as electronic payment.

Authority number provided by the National Bank of Hungary: H-EN-I-1064/2013
